

We make global selling easy for Amazon sellers. Logistics Plus® is experienced at helping Amazon sellers with their international logistics needs, which is why we are part of the Amazon Global Selling **Solutions Provider Network**. Whether you need air and ocean freight forwarding, customs brokerage, inland ground transportation, documentation, or value-added tax (VAT) and trade compliance support – Logistics Plus has you covered!

We walk Amazon sellers through the entire process, from A to Z:

- Arrange ocean booking or air flight details
- Pickup shipment from your supplier
- Bring to ocean port or airport for loading
- Upon arrival into the U.S. we customs clear the shipment
 - We are able to clear using a single-entry bond if seller does not have a continuous (annual) bond in place, foreign or domestic
- Once ready, we pick up the cargo from the ocean port or airport
- Destination options:
 - Bring to Logistics Plus local warehouse for labeling, palletizing, etc. (whatever the customer's needs are – we assist)
 - Deliver to designated Fulfillment By Amazon (FBA) warehouse (or direct-to-customer) if all pieces are labeled according to requirements
 - Delivery using Logistics Plus ground delivery services
 - Delivery using Amazon's small pack or ground delivery services
