Diversify your equipment options with rail and intermodal freight services

If you're looking to decrease your reliance on truckload capacity, rail and intermodal might be good options. Logistics Plus can help you stay competitive with this environmentally friendly transportation mode while keeping you on schedule and on budget.

Easily ship anywhere worldwide. Logistics Plus can help find a train for your shipments; our North American network includes all U.S. Class I railroads in the U.S. and Canada, and additional railways in many other countries around the world – plus access to dry-van and temperature-controlled intermodal containers.

The Logistics Plus North American Division (NAD) and Global Project Cargo teams coordinate with you to monitor every step from pick-up through delivery, for same-day shipments as well as committed container capacity projects. Our online and mobile technologies give you full visibility into each shipment. transportation.

We are registered with all Class I Railways!

Class I Railroads of North America

There are six U.S. Class I freight railroad companies. Canada has two Class I freight railroads, both of which have trackage in the U.S.. Mexico has two Class I freight railroads, one with trackage in the U.S.
