

# Business Continuity Plan

Logistics Plus® has business continuity procedures developed and documented.

## Our Business Continuity Statement:

- + Logistics Plus Inc. has business continuity procedures developed and documented. These procedures are shared internally with the appropriate teams. Senior management assigns responsibility for overall management of critical response and recovery efforts. Management approved plan includes continuance of business in all areas and locations after catastrophic conditions, including insurance and operational contingencies. There is periodic testing and adjusting of business resiliency procedures as necessary. In the event of a disruption that impacts delivery of key service provider products, our vendors are required to communicate with all stakeholders via standard channels.
