## A BUSINESS INTELLIGENCE TOOL THAT PROVIDES DETAILED DASHBOARDS AND ANALYTICS

- A **summary** report with total LTL and FTL spend by mode and carrier
- A detailed **lane analysis** report with network velocity metrics
- A **lane performance** report with average shipment cost trends by location
- A **shipment details** report that can be exported to Excel
- A freight **charges summary** report with historical trending
- A **weather alerts** map detailing weather events that may impact domestic supply chains

# API WEB SERVICES INTEGRATION

## NEED TO INTEGRATE OUR TMS WITH YOUR ERP OR BACK-OFFICE SYSTEMS?

- All of the basic features found in eShipPlus, e.g., Estimate Rate, Rate And Schedule, Shipment Tracking, Documents, etc., are available via API.
- Visit the **Developer Access Request** page (or contact us if you don't see it in your menu) to request API or Web Services documentation and support.

The screenshot shows the eShipPlus user interface. At the top, there's a header with the eShipPlus logo, a 'Provide Feedback' link, and a 'LOGISTICS+' logo with the tagline 'PASSION FOR EXCELLENCE'. Below the header is a navigation bar with 'Dashboard', 'Help', and a 'Sign Out' button. The main content area is titled 'SYSTEM INTEGRATIONS' and contains a section for 'WEB API INTEGRATION'. This section explains that the eShipPlus application provides REST APIs for integration and includes sub-sections for 'Getting Started', 'Going Live', and 'Documentation'. The 'Getting Started' section lists steps for requesting test credentials and provisioning. The 'Going Live' section describes the process of transitioning to production credentials. The 'Documentation' section points to available API documentation. Below this is a section for 'DOCUMENT DELIVERY', which explains that system-generated and tagged documents can be delivered via FTP. It includes a 'Deliverable Documents' list with 'System Generated Documents' (Bill of Lading, Shipment Statement, Invoice) and 'Tagged Documents' (POD, special documents). A 'Getting Started' section for document delivery lists steps for identifying documents, providing FTP credentials (URL, USERNAME, PASSWORD, SSL, folder), and initiating the request.
