

# Girders & Stanchions from Germany to Greece

- + Project handled through Logistics Plus Belgium partnership with Carl Polzin.
- + The first part of the shipment saw **5 girders of 7 meter wide** and 95mt being trucked to Mannheim barge terminal, loaded to barge, shipped to Rotterdam.
- + The second part of the shipment saw **4 stanchions of 5.1 meter high and 72mt** that could not be trucked to Mannheim, but only to Gernsheim and even then a 'flyover bridge reinforcement' (to put a steel bridge atop the actual bridge to strengthen it) had to be used to allow the heavy load to cross that bridge.
- + Then all the cargo was shipped from Rotterdam to Thessaloniki and from there by truck to site.

Start: 01/01/2017

End: 04/09/2017

From: Germany

To: Greece
