

LOGISTICS PLUS

focus on special services in project transportation

Stating that they offer specialized services in project transportation in Türkiye for a wide range of industries including wind, geothermal, oil and gas, Logistics Plus General Manager Bahadır Erdil said, "With our extensive knowledge and expertise in project logistics, we are able to offer customized solutions to meet the unique needs of our customers in every sector."

Bahadır Erdil

How does energy, project and heavy cargo transportation differ from other logistics services? What should be considered in services in this field?

Project Logistics is unlike any other type of logistics service. It includes a variety of disciplines in it. It is not only transportation from A to B. Timeline Planning, QHSE, Strategic Planning, Future Energy&Freight&Bunker Market Trends Planning, Risk Management Planning involves identifying, analyzing and managing risks associated with infrastructure/ routes/ tradelanes, etc.

I mean, this is more complicated than you may think.

Logistics Plus Inc. with which services does it make a difference in the market of energy, project and heavy cargoes transportation logistics services?

Logistics Plus is a pioneer in the Project logistics market, we have in-house engineers, shipbrokers, customs brokers and IOR specialists, which allows us to provide a more comprehensive and efficient service to our clients.

We have a track record of successfully completing some of the most complex, difficult and heavy projects in the region, including shipping 3 units from Shanghai to Jubail with 6.152 freight tons in 2022, which is one of the

largest projects with the fewest units (3 units) shipped ever recorded.

GIANT TRANSPORT FROM SHANGHAI TO JUBAIL

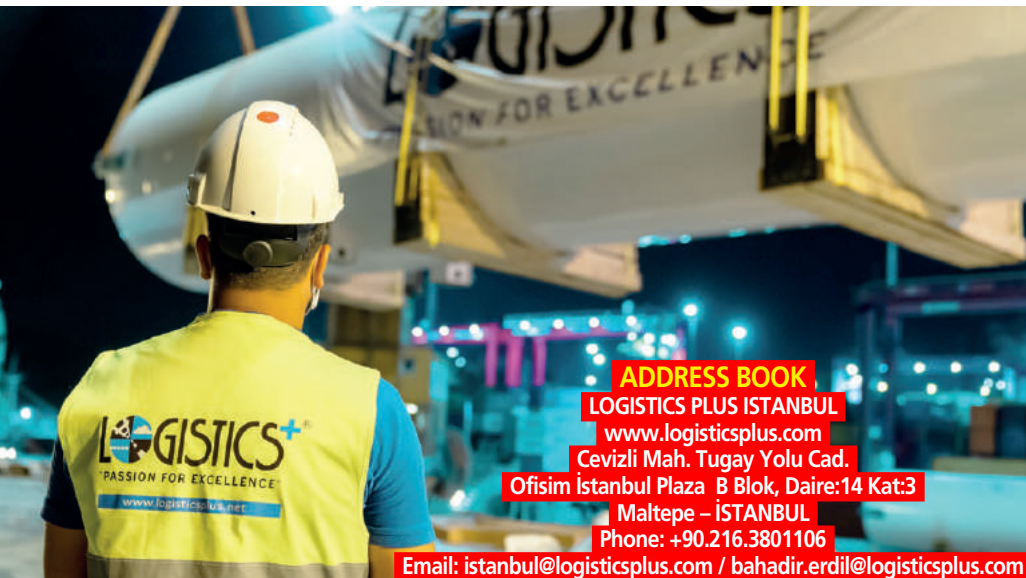

What kind of cargo volume did you reach in 2022 in energy, project and heavy cargo transportation? What were the important projects you signed?

As I mentioned, Logistics Plus Türkiye had shipped 3 units from Shanghai to Jubail with 6.152 freight tons in 2022, which is one of the largest projects with the fewest units (3 units) shipped ever recorded.

Logistics Plus Türkiye specializes in Project logistics for a wide range of industries, including wind, geothermal, oil&gas. We have experience in handling various types of cargo, including auto cranes, condensers, transformers, gas tanks, oil rigs, among others. With our extensive knowledge and expertise in project logistics, we are able to provide customized solutions to meet the unique needs of our clients in each industry.

What would you like to say about the growth volume of the energy, project and heavy cargo transportation logistics market? What kind of potential does Türkiye have in this field?

Türkiye's manufacturing industry has enormous potential, driven by its skilled workforce, advanced technology, and favorable cost of labor. With its

strong focus on quality and innovation,

Turkiye is poised to become a major player in the global manufacturing market, particularly in the areas of power grid, gas tanks, wind energy, and cement plant components etc.

The wind energy industry is also an area of significant growth in Turkiye. The country's favorable climate and geography have made it an ideal location for wind farms, and Turkish companies have become leading producers of wind energy components, including blades, towers, hubs and foundations. With its strong focus on renewable energy, Turkiye is well-positioned to become a key player in the global wind energy market.

3 MORE COUNTRY OFFICES TO OPEN IN 2023

What's on your 2023 agenda for energy, project and heavy cargo logistics? What are your growth and investment plans?

Logistics Plus has recently opened 5 new country offices in Brazil, Malaysia, Vietnam, Egypt, and Poland, and we are planning to add 3 more country offices to our global network in 2023, which will bring our total number of global country offices to 32. This expansion will allow us to further expand our services to new markets and better serve our clients in those regions.

"We've seen an influx of new European Project Logistics companies entering to Turkish market, which is great news for our industry since we feel that quality is the most important factor in competitiveness."

Global Logistics + So Much More.

Logistics Plus® is much more than a leading worldwide provider of transportation, warehousing, fulfillment, business intelligence, technology, and supply chain solutions.

We are a **21st Century Logistics Company™**.
And with our trademark **Passion for Excellence™**, we put the + in logistics by doing the big things properly, plus the countless little things that ensure complete customer satisfaction and success.

Our global project offices look forward to serving you.
