

FOR IMMEDIATE RELEASE

Logistics Plus Selected as a Top 100 3PL Provider by Inbound Logistics for a Fourth Year

The annual lists recognized the top third-party logistics providers deemed the best of the best by Inbound Logistics editors.

ERIE, PA (August 4, 2025) – Logistics Plus, Inc. (LP), a global leader in transportation, logistics, and unique supply chain solutions, is proud to announce that it has been selected as a **2025 Top 100 3PL Provider** by *Inbound Logistics*, a leading supply chain and logistics industry publication. It's the fourth consecutive year that Logistics Plus has been named to the list. The Top 100 list appears in the July 2025 edition of Inbound Logistics and across all content platforms, including magazine, digital, web, and app.

"Every great band needs a solid drummer—the one who sets the tempo, drives the energy, and keeps everyone in sync. In the supply chain, that's exactly what top-performing 3PLs do. You keep the supply chain on beat, responsive, and ready to adapt," said Felicia Stratten, Editor, *Inbound Logistics*. "That's why Logistics Plus has been selected as an Inbound Logistics Top 100 Third-Party Logistics Provider for 2025."

Supply Chain Challenge? **SOLVED**

Decommissioning and Reconfiguring an Aging Cryptocurrency Data Center in Texas

Logistics Plus® LP Crypto Mission Critical™ provides an end-to-end supply chain solution with installation services, extended workforce, and complete inventory visibility, reducing costs and enhancing ROI for the client.

THE CHALLENGE
A leading cryptocurrency miner operating a distributed data center network faced the complex task of upgrading a 30 MW Bitcoin mining facility in Texas. The site, hosting an aging infrastructure and a large fleet of older-generation S19 miners, required substantial electrical and infrastructure enhancements to accommodate new S21-generation miners.

Key challenges included executing electrical upgrades in two distinct phases, minimizing operational downtime, addressing a limited skilled labor pool near the site, and managing risks associated with U.S. Customs, site operations, and material flows.

THE SOLUTION
The LP Crypto Mission Critical (LPCMC) team engineered a comprehensive, phased approach to overcome the client's obstacles. The project involved the decommissioning and asset recovery of over 9,000 S19 miners and the commissioning of more than 7,000 S21 Pro miners. LPCMC designed a detailed logistics plan, splitting purchase orders across multiple air and ocean shipments to align deliveries with site upgrade timelines and to balance workload across both phases.

LPCMC fully managed inbound and outbound transportation for all mining units, enabling equipment and consumables. LPCMC carefully removed the decommissioned units,

catalyzed them in its warehouse management system, and then stored them at its regional office warehouse. Onsite, LPCMC deployed a specialized workforce of over 15 personnel to execute a range of critical tasks, including de-racking S19 units, remodeling racking infrastructure, upgrading power distribution systems, and managing the installation, configuration, and troubleshooting of new S21 units.

Additionally, LPCMC ensured proper handling of e-waste, implemented recycling protocols, and maintained meticulous inventory visibility throughout the project.

THE RESULTS
Through proactive logistics sequencing and onsite workforce expansion, LPCMC successfully condensed installation and commissioning activities, significantly

minimizing downtime. Strategic planning reduced total project costs while maximizing operational efficiency. Thanks to the full lifecycle management provided by LPCMC, the client achieved a rapid return on investment, maintaining complete visibility over both the retired S19 units and the newly deployed S21 assets. Ultimately, LPCMC enabled the client to modernize their facility quickly, efficiently, and with minimal disruption to their operations.
