

Supply Chain Success Story!

A Towering Achievement in Project Cargo Delivery

THE STORY

When a European industrial manufacturer needed to transport a massive 60-ton absorption tower from Turkey to a remote site in Finland, they turned to Logistics Plus for expert support. The job required precision planning, multimodal coordination, and seamless execution across borders. With deep project cargo expertise and global reach, Logistics Plus engineered a transport plan that safely delivered the 21.6-meter-long tower—without delays, damages, or surprises.

THE HIGHLIGHTS

- **Heavy Lift Expertise:** Logistics Plus coordinated the transport of a 59.9-ton, 8.1-meter-tall absorption tower using specialized trucking and ocean freight equipment capable of handling extreme dimensions and weight.
- **Multimodal Transport Plan:** The project included inland transport from the Turkish factory to port, ocean shipment across the Baltic region, and final overland delivery through Finland's rugged terrain.
- **Customs & Port Coordination:** LP managed all documentation, port handling, and customs clearance processes—ensuring regulatory compliance and smooth cross-border transitions.
- **Risk Mitigation & Monitoring:** With potential delays due to weather, port congestion, and infrastructure limitations, LP built contingency options into the plan and monitored every milestone in real time.
- **Global Project Team:** Logistics Plus leveraged its international project cargo specialists in Turkey, Finland, and key logistics hubs to align operations across regions and time zones.

Creative Solutions for Unique Challenges.
