

## Supply Chain Success Story!

# Heavy Cargo Across Continents: Delivering to Europe & West Africa

## THE STORY

When multiple clients needed to move heavy tower components, turbine parts, and large machinery across continents, Logistics Plus stepped in with its vessel chartering expertise. The LP France team orchestrated multi-cargo vessel movements, cross-border road transportation, and precise inland handling for deliveries from Spain, Türkiye, and France to multiple discharge ports. Each delivery was completed on time, despite varied regulations and geographic challenges.

## THE HIGHLIGHTS

- **Multi-Vessel Charters:** LP France managed two large breakbulk vessel charters from Türkiye to multiple West African ports, including all documentation and coordination.
- **European Tower Delivery:** Logistics Plus arranged tower transport from Spain to Belgium using road transport, including oversize permitting and escort support.
- **Machinery Shipment to China:** The team managed a 44-ton machinery move from France to China, coordinating ocean and inland freight legs.
- **International Expertise:** The European LP project team handled diverse operational, documentation, and regulatory requirements with precision and flexibility.
