

Supply Chain Success Story!

Heavy Lift, Heavy Impact: Supporting Port Construction in Libya

THE STORY

When a major infrastructure project in Benghazi, Libya required the delivery of a large crawler crane—measuring over 7,300 CBM—a leading construction firm turned to Logistics Plus China for its project cargo expertise. The mission was critical: transport oversized equipment across continents and deliver it safely to support the country's port construction initiative.

With careful coordination between local vendors, ocean carriers, and destination authorities, Logistics Plus managed every detail—securing port availability, organizing heavy-lift handling, and facilitating international compliance. The entire port of Benghazi was temporarily cleared to receive this crane, making LP's successful delivery essential to the project's momentum.

THE HIGHLIGHTS

- **Massive Cargo Movement:** Logistics Plus coordinated the international transport of a 7,300 CBM crawler crane from China to Benghazi, Libya, managing both sea freight and destination discharge logistics.
- **Port-Clearing Priority:** The project was deemed so vital that the Port of Benghazi was cleared of other ships to accommodate the arrival of the cargo—a rare operational privilege.
- **Heavy-Lift Expertise:** The LP China team orchestrated the handling and secure lifting of the crane at origin and destination ports, meeting all safety and dimensional requirements.
- **End-to-End Oversight:** From documentation and customs to vendor collaboration and port liaison, LP provided a fully managed project solution with transparent communication across all stakeholders.

Creative Solutions for Unique Challenges.
