

LITHIUM BATTERY LOGISTICS: COMPLIANT, SECURE, AND ON SCHEDULE

Transporting lithium-ion batteries is complex and high-risk. **Logistics Plus** simplifies the process, providing the hazmat expertise you need to keep your supply chain moving without delays or regulatory penalties. From initial packaging to final delivery, we ensure your shipments meet all international and domestic safety standards.

OUR SPECIALIZED HAZMAT SERVICES

- Precision Labeling & Classification: Expert support for Class 9, UN 3480 & UN 3481 shipments, ensuring every box is marked correctly.
- Regulatory-Grade Preparation: Hands-on assistance with palletization, package marking, and labeling for air, ocean, and domestic transport.
- Documentation Audit: A final, rigorous review of your shipping papers to ensure total alignment before cargo is tendered.
- Rapid Mobilization: On-demand access to the tools, regulatory expertise, and materials needed for time-critical shipments.
- Seamless Coordination: We bridge the gap between your export teams, freight forwarders, and carriers to eliminate bottlenecks

WHY PARTNER WITH LOGISTICS PLUS?

- Certified Expertise: Our team specializes in dangerous goods, keeping you updated on ever-changing domestic and international dangerous goods transportation regulations.
- Hands-On Support: We don't just advise; we act. We provide on-the-ground support for your most urgent, high-stakes loads.
- Global Operational Power: A worldwide network that understands the nuances of ports, carriers, and regulated freight, ensuring your cargo clears every checkpoint.
